Nugegoda - Sri Lanka

Education

BSc (Hons) in Computer Science

Sri Lanka Institute of Information Technology (SLIIT)

2024 Present

Sri Lanka

- CGPA: 3.58

Secondary Education

Ananda College Colombo 10

(2020 – 2022)

Profile

Third-year Computer Science undergraduate and Dean's List award recipient at SLIIT, with experience building full-stack and distributed applications using Java, Spring Boot, C#, ASP.NET Core, React, and SQL. Contributed to open-source projects through merged code and documentation pull requests. Familiar with Git, Linux, Docker, Azure, and GitHub Actions. A collaborative and curious developer who enjoys solving problems, learning new technologies, and building reliable software.

Skills

Languages: Java, JavaScript, C#, C

Backend: Spring Boot, REST APIs, ASP.NET Core, JWT authentication

Frontend: React.js

Databases: MySQL, PostgreSQL

Cloud & CI/CD: Microsoft Azure, GitHub Actions

Operating Systems & Tools: Linux, Bash/Shell scripting, Git/GitHub, Docker, Postman, Jira

Concepts: Object-oriented programming, microservices, Agile/Scrum

Projects

EventPulse – Event Ticketing Platform | <https://github.com/manuth07/EventPulse.git>

ASP.NET Core, React, PostgreSQL, Azure, Apache Kafka(KRaft), Stripe, Jira

- Developed a microservices based event discovery and ticket selling platform with separate Identity, Event, Booking, and Payment services connected through a YARP API gateway.
- Integrated Apache Kafka and Stripe into the platform; implemented event submission and approval workflows with ASP.NET Core APIs and PostgreSQL.
- Deployed the application to Microsoft Azure and set up a CI/CD pipeline in GitHub Actions; collaborated in Jira-managed sprints to test workflows and track defects.

LearnLink – Academic Networking Platform | <https://github.com/manuth07/LearnLink>

Java, Spring Boot, React.js, PostgreSQL, JWT, Jira

- Developed a full-stack academic networking platform connecting students, academics, and institutions.
- Implemented JWT-based authentication, posts, dynamic feeds, user following, profiles, and search functionality.
- Collaborated on the project using Agile project management practices and Jira

Distributed Payment Consensus System | <https://github.com/manuth07/distributed-payment-system>

Java, Spring Boot, Apache Kafka, Apache ZooKeeper, Nginx, Docker

- Developed a prototype fault-tolerant distributed payment processing system using a 5-node service cluster.

- Implemented asynchronous payment event communication using Apache Kafka.
- Used Apache ZooKeeper for distributed coordination and designed the system around leader-based coordination and fault-tolerant architecture.

HappyHeels – E-Commerce Shoe Store | <https://github.com/manuth07/HappyHeels>

Spring Boot, Java, MySQL, React

- Built a full-stack e-commerce application with a Spring Boot backend, MySQL database, and React frontend
- Applied object-oriented design and connected the frontend to backend application functionality.

Leadership

- **Assistant Secretary** — Computer Science Student Community (2026-2027)

Supported the planning and organization of student hackathons and peer learning sessions. Coordinated with committee members on event arrangements and communication, and helped create opportunities for students to learn, collaborate, and share ideas.

- **Batch Representative** — Computer Science Batch (2024) (2025-2026)

Acted as a point of contact between students and lecturers by sharing academic updates, gathering student feedback, and communicating questions or concerns. Represented students' perspectives in discussions and followed up with lecturers to help address issues affecting the batch.
